

Producing healthy birds

with **The Answer® Products**

A complete line of products designed to improve bird quality and performance, while protecting the environment, the workforce, and consumers alike and helping producers and processors improve their bottom line.

The Answer® Products provide

- More efficient digestion of feed
- More effective absorption of nutrients
- Improved resistance to disease and infections
- Improved absorption of water and trace minerals to include electrolytes
- Better balance in the process of eliminating waste
- Improving bird health while reducing the use of antibiotics
- Reduction of stress
- Improving the size, vigor and productivity of the bird while eliminating the use of chemical additives such as hormones and other less popular additives
- Maintaining clean and sanitary facilities while eliminating the use of hazardous and toxic chemicals.
- Maintaining environment and neighbor friendly operations
- Improved Bottom Line
